NANOSTAFF DUO • NANOSTAFF 5 SPOTLIGHTS

Setting up of the luminaire before installation

- 1 The set includes:
1 luminaire equipped with quick connectors
1 extension cable with 2 or 5 connectors
1 driver (picture as an example)

- 2 Remove the extension cable by taking off the quick connectors

- 3 Push on the rear part of each LED spot in order to remove them from the gypsum block

All the connections have to be made before powering up, otherwise the luminaires could be seriously damaged.

NANOSTAFF DUO • NANOSTAFF 5 SPOTLIGHTS

Installation guide

- 1 Insert the multi-plug cable into the ceiling

- 2 Insert the gypsum block and fix it
If necessary: adjust the high of the brackets according to the ceiling's thickness

- 3 Make the finishing seal around the gypsum block covering the screws
Make the painting

- 4 Insert the LED spots and fix them using the quick connectors
Insert the spotlights until you hear a "click" (contact with the magnets or the spring plungers)
Tilted version:
Install the LED spots so that they are perfectly aligned with the surface

All the connections have to be made before powering up,
otherwise the luminaires could be seriously damaged.

NANOSTAFF DUO • NANOSTAFF 5 SPOTLIGHTS

Installation guide (without spot removal using masking caps) (1/2)

- 1 Insert the multi-plug cable into the ceiling

- 2 Insert the gypsum block and fix it
If necessary: adjust the high of the brackets according to the ceiling's thickness

- 3 Insert the silicone masking caps into the spotlight cavities
The caps push back the spotlights a few millimeters and close the holes completely

- 3 Make the finishing seal around the gypsum block covering the screws
Make the painting

All the connections have to be made before powering up,
otherwise the luminaires could be seriously damaged.

NANOSTAFF DUO • NANOSTAFF 5 SPOTLIGHTS

Installation guide (without spot removal using masking caps) (2/2)

- 5** Remove the plugs right after applying the paint, before it has dried, to prevent cracking.
- 6** If necessary: use the extractor to return the spotlights to their flush position : Insert the extractor supplied into the 2 holes in each spotlight and pull until the spotlight “clicks” into place
Tilted versions:
Align the spotlights so that the bevel is flush with the ceiling surface.

All the connections have to be made before powering up,
otherwise the luminaires could be seriously damaged.

NANOSTAFF DUO • NANOSTAFF 5 SPOTLIGHTS

Replacement of LED spotlight(s)

- 1 Insert the supplied extractor into the 2 holes of the LED spot to be replaced

- 2 Pull the extractor down to remove the LED spot

- 3 Remove the LED spot using the quick connector

- 4 Install the new LED spot using the remaining quick connector in the ceiling
Insert the spotlights until you hear a “click” (contact with the magnets or the spring plungers)

Tilted version:

Align the spotlights so that the bevel is flush with the ceiling surface

All the connections have to be made before powering up, otherwise the luminaires could be seriously damaged.
